HER INTERESTS AT THE COM-ING FAIR.

A Proposition to Form An Hawaiian Exhibition Company-The Work of Collecting Exhibits Started.

A proposition is on foot to organize an Hawaiian Exhibition Company to purchase the concession granted to Lorrin A. Thurston and W. F. Sesser with the exception of a certain portion of the site granted by said concession which is required by the Kilauea Cyclorama Company.

It is proposed to organize a company with a capital of fifty thousand dollars, one-half of which will be issued to the cash subscribers and the other half to the promoters. All stock to participate in dividends from the first, the promoters to give the cash sub-scribers a bonus of half their stock.

The object of the company is to make an exhibit of the people, manners, customs, manufactures and products of the Islands of the Pacific, more particularly of the Hawaiian Islands, at the California Midwinter International Exposition to be held at San Francisco from January 1st, to July 1st, 1894.

It is proposed to make an exhibit covering several different classes of subjects, viz:-

1. A general exhibition of paintings, photographs, photogravures, surveys, maps, publications, relief maps, educational methods, industrial school products, curios, woods, fruits, fibres, grains, sugar, rice, coffee, manufactures and products of the Islands. In order to obtain such exhibits it is proposed to make an offer to the Hawaiian Government and exhibitors to take all exhibits delivered by them at the wharf in Honolulu, transport them to San Francisco, furnish buildings and attendants at the Fair exhibit, and if desired, return them to Honolulu, free of cost to the owner.

A village of houses typical of Hawaiian tropical architecture, inhabited by native Hawaiians, engaged in various employments.

The buildings all to be of simple construction, the village buildings being small cottages with samples of the old grass houses; others to be of plain tongue and groove covered outside with cocoanut leaves and inside with

The people will be persons engaged about the concession and their families. Employments to be engaged in, are making leis, shell work, seed work fans, mats, nets, hats, polishing kukui

and cocoanuts, &c , &c. (3.) Sub concessions will be granted to persons desiring to sell articles on the premises, charging them a percent age on their receipts-for example concessions to sell Kona coffee-curios, fans, mats, photographs, canes, coins, stamps, jewelry &c.

(4.). Exhibit of a special and popu lar character would be provided by the Company-for example:-

Live fish in tanks, including sharks, squids, turtles, hihimanu, &c. 2. Lave Hawaiian geese, sea birds wingless birds, &c.

Bullocks and donkeys for riding. including a supply for a lake and fountain, and clay for puddling.

5. The Hawaiian band giving daily concerts within the concession. The Fair will emply the band

during a portion of the time, thereby reducing the expenses. (4) A South Sea village upon the same general lines as the Hawaiian village will be established, separate

from the latter, either as a sub-conces sion or by the company.

(5) An exhibition hall showing either as a sub-concession or by the

THE HAWAIIAN BAND.

No estimate of expenses of, or eceipts from the band are included in the above, for the reason that there has not yet been time to ascertain upon what terms their services can be procured, nor what arrangements can be made with the Fair for having them play for the Fair during a part of the

The Director-General states, however, that he will favor such a proposition, and that the matter will be taken up as soon as they advance to consideration of details of that description.

Any agreement made with the band would be up n a basis which would make it more than pay for itself.

THE MAKIKI PUMPING PLANT AT WORK.

No Further Use for the Other Artesian Wells or the Fire Engine-Plenty of Water Now.

The Makiki pumping plant has been horoughly tested and is doing better work than even its projectors and builders anticipated. The well is answering all expectations, and in spite of the immense stream now being con. stantly pumped from it, shows not the slightest sign of diminution in quantity. The quality of the water, if anything, is improving, as there is less foreign matter in it than at first. Yesterday an actual test was made of the capacity of San Francisco about the 25th inst. the new pumping plant by Messrs. Andrew Brown, Alexander Young and others interested. The water from the spring above was shut off, the discharge pipe from the reservoir closed and the depth of water in it carefully measured. The pumps were then started on an hour's run, at the end of which the water in the reservoir was ernment stamps was exhausted this again measured. Taking the run of
